

May 2011

Dear colleagues,

With the strides forward that we have made in our CAD/CAM technologies, we are proud to present our new product: the ***Zirconia Individual Implant Abutment***.

This product is case-specific and custom-designed for your consideration in relevant clinical cases.

The qualities and medical advantages of Zirconia are well known and widely recognized, resulting in its fast growth in popularity and demand by both clinicians and patients.

Among its general advantages are:

- Excellent, long-lasting physical properties.
- Highest biocompatibility and tissue acceptance (closest to pure titanium characteristics).
- Excellent accuracy and marginal fit.
- Most aesthetically-pleasing outcome.

Additional advantages for implant cases of *custom-designed Zirconium abutments*:

- Soft tissue health, integrity, and appearance.
- Natural emergence profile for both for anterior and posterior dentition.
- Ease of removal of cement-rests at cementation stage.
- Natural contact areas and potential food-impaction prevention.

### Case presentation

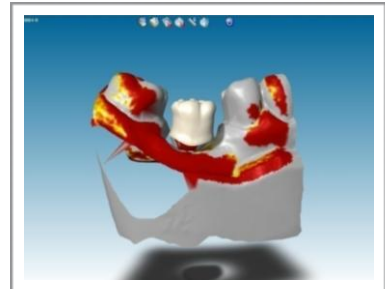

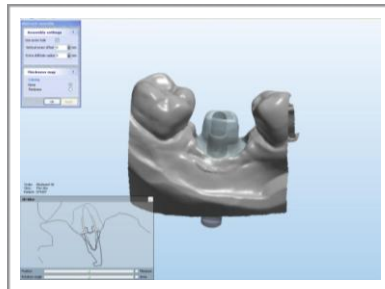

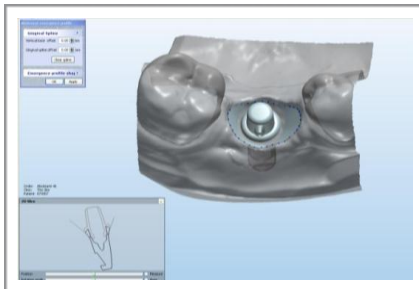

Site preparation may be done by both prefabricated means or temporary restorations (we can provide the pre-designed temporary restoration).

Scanning of the model and implant site

3D site-specific design

CAD/CAM abutment fabricated

Site-related final shape of different abutments

Abutment and crown-copping tested on working model

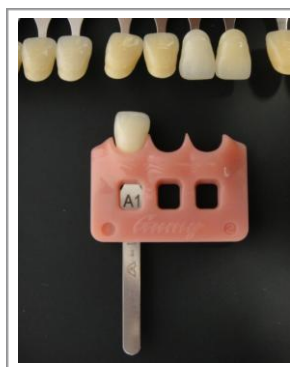

Finished restoration and,

Final clinical result:

Additionally, we would like to call your attention to a simple, yet effective, means of color communication for cases in which soft tissue reconstruction would be required as part of the final restoration - the *Gummy* gingival indicator” by Shofu:

We thank you all for your trust and cooperation. Please do contact us for further information.
